

## PROFESSIONAL STATEMENT

My goal is to grow my experience in an enterprise environment. I aim to solidify my knowledge through obtaining valuable & demanding certification from world leading organisations.

## EXPERIENCE

● Feb 16

### ENTERPRISE SERVICES GRADUATE

COMMONWEALTH BANK OF AUSTRALIA

#### Third Rotation: Continuous Delivery Engineering

- DevOps Engineering role in the build domain responsible for JFrog Artifactory, SonarQube, NuGet, GitHub Enterprise, Atlassian BitBucket Server and JetBrains TeamCity
- Consulting, promoting, engineering, developing and implementing tools and processes that automate the flow of code through Continuous Integration/Continuous Deployment (CI/CD) build pipelines and tools listed above.
- Provide 3rd level support and training of CI/CD tools listed previously.
- Provide consultancy and engineering for projects in regards to CI/CD
- Developing and using Ansible scripts to automate workflows
- Monitoring and logging of services using AppDynamics and Splunk
- Project work

#### Key Achievements:

- Lead the engineering effort on a project for integrating Selenium Grid (testing framework) into Amazon Web Services (AWS).
- Established the Git-flow model used for all code repositories specific to the team
- Created an automated build pipeline for creating Vagrant boxes using Packer, Ansible and VirtualBox for local development and testing
- Implementation of JFrog Artifactory, Mission Control and Xray in the bank's production environment and onto AWS
- Developed AppDynamics monitors for Artifactory package managers (i.e. Yum, PyPI, Gems, NuGet, etc.) to observe and mimic end-user response times, errors and experience.

#### Second Rotation: Project Quality Control

#### Key Achievements

- Integrated collaboration tools such as OneNote into team workflow
- Created VBA scripts to automate tasks within Excel and Outlook
- Collaborated in the development of a team dashboard built through Excel which queries several data sources

#### First Rotation: Resource Management

#### Key Achievements

- Created a standard operating procedure for onboarding new employees & contractors
- Co-developed a graphical & sortable web interface for Resource Managers showing the amount of new hires & hiring requests within each business unit.

● Mar 15 - Dec 15

### TECHNICAL SUPPORT OFFICER

E-FLO COMPUTERS

- Onsite support for residential, business & school customers.
- Installation & management of enterprise systems & networks typically running Windows Server.
- Advise on purchases & provide training on technology use.
- Configuration of iPads using Apple Configurator & Windows-based PCs using SCCM.

#### Key Achievements

- Developed a program centered around iPads at an underprivileged school in Western Sydney.
- Overhauled the computer lab at the same school which led to frequent use by teachers for lessons & students during lunchtime.
- Taught teachers how to use technology to deliver their lessons interactively through collaboration (Google Classroom, ClassDojo), video (iMovie, Green Screen) and photo (Comic Life, Puppet Pals) apps.

● Feb 14 - Feb 15

## **INNOVATIONS CENTER TECHNICAL INTERN**

IBM

- Introduce customers to the centre & supervise their sessions by setting up their requested development & testing environments on IBM hardware & software.
- Manage & maintain 80+ servers, 10Gbps networking and fibre channel storage (SAN) with 300+ VMware virtual machines.
- Identify & improve processes through scripting.
- Pioneer & provide support for IBM Bluemix (PaaS) during beta & release by developing proof-of-concept apps.
- Manage the centre's classroom containing 24 computers and its bookings for 20+ IBM training events held throughout the year.

### Key Achievements

- Set up & optimised IBM's new POWER8 systems for customer usage at the centre.
- Created interactive and automated scripts for VPN user creation & modification.
- Developed applications for management of the center such as a landing page that offers transparency to the infrastructure and services within the center, links to their web interfaces and monitoring of their current status (<https://github.com/calvinbui/home>).
- Migrated the team's document repository to a new platform before its sunseting & provided training on its use and features.
- Created a survey building app on IBM Bluemix to be used across IBM ANZ for Bluemix events.

---

## **EDUCATION**

2012 - 2015

### **BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY**

UNIVERSITY OF TECHNOLOGY, SYDNEY

Graduated with Distinction

---

## **CERTIFICATIONS, AWARDS & ACTIVITIES**

- VMware vSphere 6 Masterclass Short Course (2016)
- Fairfield OzTag Mens Opens (2016)
- Full Drivers & Provisional Motorcycle Licence (2015)
- IBM DB2 Academic Associate (2014)
- Agile Project Management Short Course (2013)
- UTS Discovery Day Team Leader (2013)
- Cisco Certified Entry Networking Technician (2012)
- Languages: English (native) & Vietnamese (proficient)
